Contributions should, preferably, be sent to a member of the Advisory Editorial Board (addresses are given in the first issue of each volume) who is familiar with the research reported, or to one of the Editors:

A.D. BUCKINGHAM, F.R.S.
D.A. KING, F.R.S.
Editor of Chemical Physics Letters
University Chemical Laboratory
Lensfield Road
Cambridge CB2 1EW, UK
FAX 44-223-336362

A.H. ZEWAIL
Chemical Physics Letters
A.A. Noyes Laboratory of Chemical Physics
California Institute of Technology
Mail Code 127-72
Pasadena, CA 91125, USA
FAX 1-818-4050454

*Important: please adhere to instructions to authors, to be found on the last page of each volume.*

After acceptance of the paper for publication, all further correspondence should be sent to the publishers (Ms. S.A. Hallink, Editorial Department, Chemistry & Chemical Engineering Department, P.O. Box 330, 1000 AH Amsterdam, The Netherlands; telephone 31-20-5862664, FAX 31-20-5862459, telex 10704 espom nl; electronic mail X400: C = NL; A = 400NET; P = SURF; O = ELSEVIER; S = VONK, I = W or RFC822: W. VONK @ELSEVIER.NL).

Chemical Physics Letters is published weekly. For 1992, 12 volumes, volumes 186–197 (72 issues) have been announced. The subscription price for these volumes is Dfl. 5712.00 (US$ 3119.00). Postage and handling amount to Dfl. 372.00 (US$ 203.00). Therefore the total price for 1992 is Dfl. 6084.00 (US$ 3322.00). The Dutch guilder price is definitive, dollar prices are for guidance only. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

Subscriptions should be sent to the publisher: ELSEVIER SCIENCE PUBLISHERS B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, or to any subscription agent or bookseller. For personal rates and conditions please contact the Publisher.

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the written permission of the Publisher, Elsevier Science Publishers B.V., P.O. Box 330, 1000 AH Amsterdam, The Netherlands.
*Special regulations for authors.* Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
*Special regulations for readers in the USA.* This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copyright of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.
No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

## List of Advisory Editors

Professor S. Andersson, Department of Physics, Chalmers University of Technology, S-412 96 Goteborg, Sweden

Professor V. Aquilanti, Dipartimento di Chimica dell'Università, via Elce di Sotto 8, 06100 Perugia, Italy. FAX 39-75-5855606

Professor A.J. Bard, Hackerman/Welch Regents Chair in Chemistry, Department of Chemistry, The University of Texas at Austin, Austin, TX 78712-1167, USA. FAX 1-512-4710088

Dr. G.S. Beddard, Department of Chemistry, The University, Manchester M13 9PL, UK

Professor Dr. V.E. Bondybey, Institut für Physikalische und Theoretische Chemie der Technischen Universität München, Lichtenbergstrasse 4, W-8046 Garching near Munich, Germany. FAX 49-89-32092727

Professor A.M. Bradshaw, Fritz-Haber Institut der Max-Planck Gesellschaft, Faradayweg 4-6, W-1000 Berlin 33 (Dahlem), Germany. FAX 49-308-305520

Dr. C. Bréchignac, Laboratoire Aimé Cotton, Bâtiment 505, Campus d'Orsay, 91405 Orsay Cedex, France. FAX 33-1-690-76891

Dr. L.E. Brus, AT&T Bell Laboratories, 600 Mountain Avenue, P.O. Box 636, Murray Hill, NJ 07974-0636, USA. FAX 1-908-5823958

Professor A.L. Buchachenko, N.N. Semenov Institute of Chemical Physics, Russian Academy of Sciences, Ulitsa Kosygina 4, 117334 Moscow, Russia. FAX 7-095-9382156

Dr. P.R. Bunker, Herzberg Institute of Astrophysics, National Research Council of Canada, Ottawa, Ontario, Canada K1A 0R6

Professor L.S. Cederbaum, Theoretische Chemie, Institut für Physikalische Chemie, Universität Heidelberg, Im Neuenheimer Feld 253, W-6900 Heidelberg, Germany. FAX 49-6221-563199

Dr. Y. Chabal, AT&T Bell Laboratories, Room 1C-462, Murray Hill, NJ 07974-2070, USA

Professor D. Chandler, Department of Chemistry, University of California, Berkeley, CA 94720, USA. FAX 1-510-6428369

Dr. M.S. Child, F.R.S., Department of Theoretical Chemistry, 5 South Parks Road, Oxford OX1 3UB, UK. FAX 44-865-275410

Professor D.P. Craig, F.R.S., Research School of Chemistry, Australian National University, Canberra, ACT 2601, Australia. FAX 61-6-2490750

Professor A. Dalgarno, F.R.S., Harvard College Observatory and Smithsonian Astrophysical Observatory, 60 Garden Street, Cambridge, MA 02138, USA. FAX 1-617-4955970

Dr. J.L. Dehmer, Building 203, Argonne National Laboratory, Argonne, IL 60439, USA. FAX 1-708-9725498

Professor R.N. Dixon, F.R.S., Department of Theoretical Chemistry, School of Chemistry, University of Bristol, Cantock's Close, Bristol BS8 1TS, UK. FAX 44-272-251295

Professor C.E. Dykstra, Department of Chemistry, Purdue University School of Science, IUPUI, 1125 East 38th Street, Indianapolis, IN 46205, USA. FAX 1-317-2744701

Professor K.B. Eisenthal, Department of Chemistry, Columbia University, Havemeyer Hall, 116th Street and Broadway, New York, NY 10027, USA. FAX 1-212-9321289

Professor Dr. R.R. Ernst, Laboratorium für Physikalische Chemie, ETH Zentrum, CH-8092 Zurich, Switzerland. FAX 41-1-2523402

Professor Dr. G. Ertl, Department of Physical Chemistry, Fritz-Haber Institut der Max-Planck Gesellschaft, Faradayweg 4-6, W-1000 Berlin 33 (Dahlem), Germany. FAX 49-308-305520

Professor C.S. Fadley, Department of Physics, University of California, Davis, Davis, CA 95616-8677, USA. FAX 1-916-7524717

Professor M.D. Fayer, Department of Chemistry, Stanford University, Stanford, CA 94305, USA. FAX 1-510-7250259

Professor G.W. Flynn, Columbia Radiation Laboratory, Department of Physics, Columbia University, 538 West 120th Street, New York, NY 10027, USA. FAX 1-212-8541289

Professor D. Freude, Sektion Physik der Universität Leipzig, Linnéstrasse 5, O-7010 Leipzig, Germany. FAX 37-41-6858221

Dr. R.H. Friend, Cavendish Laboratory, University of Cambridge, Madingley Road, Cambridge CB3 0HE, UK. FAX 44-223-63263

Professor W.R. Gentry, Department of Chemistry, University of Minnesota, Minneapolis, 207 Pleasant St. SE-Box A12, MN 55455, USA. FAX 1-612-6268659

Professor M. Glasbeek, Laboratory for Physical Chemistry, University of Amsterdam, Nieuwe Achtergracht 127, 1018 WS Amsterdam, The Netherlands. FAX 31-20-5255698

Professor A. González Ureña, Departamento de Quimica Física, Facultad de Quimica, Universidad Complutense de Madrid, 28040 Madrid, Spain. FAX 34-1-2433362

Professor Dr. Z.R. Grabowski, Institute of Physical Chemistry, Polish Academy of Sciences, Kasprzaka 44, 01-224 Warsaw, Poland. FAX 48-22-325276

Dr. H. Hamaguchi, Molecular Spectroscopy Laboratory, Kanagawa Academy of Science and Technology, KSP East 301, 100-1 Sakato, Kawasaki 213, Japan. FAX 81-44-8192029

Dr. N.C. Handy, F.R.S., University Chemical Laboratory, Lensfield Road, Cambridge CB2 1EW, UK. FAX 44-223-336362

Dr. J. Harris, Institut für Festkörperforschung, Forschungszentrum Jülich, Postfach 1913, W-5170 Julich 1, Germany.

Dr. Z. Herman, J. Heyrovský Institute of Physical Chemistry and Electrochemistry, Czechoslovak Academy of Sciences, Dolejškova 3, 182 23 Prague 8, Czechoslovakia. FAX 42-2-8582307

Professor E. Hirota, The Graduate University for Advanced Studies, 4259 Nagatsuda, Midori-ku, Yokohama 227, Japan. FAX 81-45-9222338

Professor R.M. Hochstrasser, Department of Chemistry/D5, University of Pennsylvania, Philadelphia, PA 19104, USA. FAX 1-215-8988378

Professor Dr. G.L. Hofacker, Lehrstuhl für Theoretische Chemie, Technische Universität München, Lichtenbergstrasse 4, W-8046 Garching near Munich, Germany. FAX 49-89-32092727

Professor Dr. A.J. Hoff, Department of Biophysics, Huygens Laboratorium, Rijksuniversiteit te Leiden, Postbus 9504, 2300 RA Leiden, The Netherlands. FAX 31-71-275819

Dr. B.J. Howard, Physical Chemistry Laboratory, Oxford University, South Parks Road, Oxford OX1 3QZ, UK. FAX 44-865-275410

Professor M. Ito, Department of Chemistry, Faculty of Science, Tohoku University, Sendai 980, Japan. FAX 81-22-2626609

Professor C.K. Jørgensen, Département de Chimie Minérale, Analytique et Appliquée, 30 Quai Ansermet, CH-1211 Geneva 4, Switzerland

Professor J. Jortner, Institute of Chemistry, Tel-Aviv University, 61390 Ramat Aviv, Tel Aviv, Israel. FAX 972-3-5413752

Professor Dr. W. Kaiser, Fakultät für Physik der Technischen Universität München, Arcisstrasse 21, W-8000 Munich 2, Germany. FAX 49-89-21052000

Professor J.L. Kinsey, Dean and D.R. Bullard-Welch Foundation Professor of Science, Wiess School of Natural Sciences, Rice University, P.O. Box 1892, Houston, TX 77251, USA. FAX 1-713-2855401

Professor A.W. Kleyn, FOM-Instituut voor Atoom- en Molekuulfysica, Kruislaan 407, 1098 SJ Amsterdam, The Netherlands. FAX 31-20-6684106

Professor T. Kobayashi, Department of Physics, Faculty of Science, University of Tokyo, 7-3-1 Hongo, Bunkyo ku, Tokyo 113, Japan

Professor Dr. D.M. Kolb, Abt. Elektrochemie, Universität Ulm, Postfach 4066, W-7900 Ulm, Germany. FAX 49-731-5022038

Professor K. Kuchitsu, Department of Chemistry, Nagaoka University of Technology, Nagaoka 940-21, Japan. FAX 81-258-466507

Professor Y.T. Lee, Lawrence Berkeley Laboratory, University of California, 1 Cyclotron Road, Berkeley, CA 94720, USA. FAX 1-510-4865311

Professor A.C. Legon, Department of Chemistry, University of Exeter, Stocker Road, Exeter EX4 4QD, UK. FAX 44-392-263434

**Transport Processes in Engineering Volume 2**

# Recent Advances in Heat Transfer

Proceedings of the First Baltic Heat Transfer Conference,
Göteborg, Sweden, August 26-28, 1991

*edited by* **B. Sundén**, *Chalmers University of Technology, Göteborg, Sweden and*
**A. Žukauskas**, *Lithuanian Academy of Sciences, Vilnius, Lithuania*

Heat transfer plays an important role in almost every field of engineering. Presented here is a unique collection of papers on experimental, theoretical and numerical investigations of fundamental and applied features in the fields of boiling, evaporation and two-phase flow, cooling of electronics, heat transport affected by electro-magnetic fields, and thermal radiation. Fundamental studies focusing on understanding the mechanisms of heat transfer processes as well as valuable results and formulas for engineering design are provided.

The book will serve as a valuable source of data and of recent progress in the understanding and prediction of various heat transfer phenomena. Since it not only presents a novel collection of qualified works in established fields but also in topics not commonly studied, it will be of value to researchers, engineers and those involved in mechanical, chemical and nuclear engineering.

***Contents:***

Review Papers *(6 papers)*.
Fundamental Aspects of Convective Heat Transfer *(6 papers)*.
Boiling, Evaporation and Two-Phase Flow *(13 papers)*.
Condensation *(3 papers)*.
Thermal Radiation *(6 papers)*.
Thermophysical Properties *(5 papers)*.
Heat Transfer in Channels and Coils *(3 papers)*.
Heat Transfer From Bundles *(3 papers)*.
Heat Exchangers and Fouling *(3 papers)*.
Application of Analytical Methods *(6 papers)*.
Numerical Methods in Heat Transfer *(12 papers)*.
Cooling of Electronic Equipment *(6 papers)*.
Heat Transport Affected by Electromagnetic Fields *(6 papers)*.
Applications to Energy Systems *(3 papers)*.
Heat Transfer in Fixed Beds and Fluidized Beds *(6 papers)*.
Miscellaneous Topics *(13 papers)*.
Author Index.

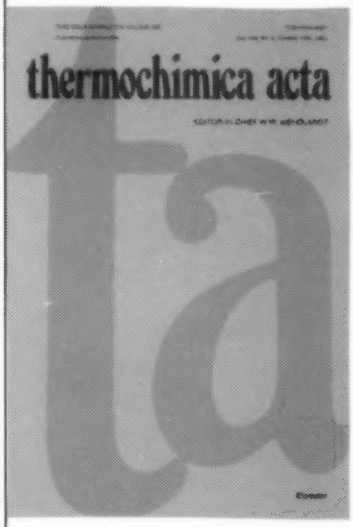
# THERMOCHIMICA ACTA

**An international journal concerned with the broader aspects of thermochemistry and its applications to chemical problems**



**Editor-in-Chief:**

**W.W. Wendlandt,** University of Houston, Houston, TX, USA

**Thermochimica Acta** publishes original research contributions in thermal analysis, thermochemistry, and chemical thermodynamics. Specific areas of research include:

- Static calorimetry of all types
- Dynamic calorimetry of all types including differential scanning calorimetry (DSC), specific heat calorimetry, and others
- Low and high temperature thermodynamic studies of all types
- Thermal analysis techniques of all types such as thermogravimetry (TG), differential thermogravimetry (DTG), differential thermal analysis (DTA), evolved gas detection (or analysis), all types of pyrolysis procedures, high temperature X-ray, nuclear magnetic resonance, infrared and reflectance spectroscopy, electrical conductivity, magnetic and other measurements.
